## DETAILED ACTION

### *Allowance*

**Claims 1-8, 11, 13-19** are allowed.

The following is an examiner's statement of reasons for allowance:

Prior art fails to teach a process of producing epoxides in the presence of an epoxidation catalyst obtained according to process of blending a mixture comprising a TS-1 (defined in specification- pg. 2, lines 1-4) titanium zeolite powder, water, at least one silicon derivative binder in an amount of more than 5% and less than 20% by weight compared to the weight of the titanium zeolite, at least one plasticizer in an amount of at least 1% and less than 10% by weight compared to the weight of the titanium zeolite, and a distinct pore-forming substance in an amount of 5-35% by weight compared to the weight of the titanium zeolite.

The closest disclosure of Grosch (DE 19623611) teaches a process of producing epoxides using an epoxidation catalyst obtained by blending a mixture of titanium zeolite, water, binder, and plasticizer. However, Grosch fails to disclose a TS-1 titanium zeolite and the claimed amounts of plasticizer or any pore-forming substance. Hefele (US 6458970) discloses adding various binders and pore-formers in preparing catalyst composition containing titanium dioxide and vanadium pentoxide, but does not teach a catalyst based on TS-1 titanium zeolite. Moreover, no suggestion or motivation was found for one of ordinary skill in the art at the time of the invention to modify prior art catalyst preparation processes so as to utilize a TS-1 titanium zeolite, silicon-derivative binder, plasticizer and pore-forming substance in the claimed amounts.

Art Unit: 1793

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
